HARDIE, J. KEIR

India

Impressions and Suggestions

$1.00, net; by mail, $1.08

"OTHERS have written more thoroughly about India than Keir Hardie. But as a polemic tract on the part of the opposition against the British policy in India the little book is a masterpiece. It will be paid the compliment not before accorded any book on the Indian situation of being read by the people."—*Boston Herald.*

GORKY, MAXIM

The Spy

The Story of a Superfluous Man

$1.50 postpaid

THIS is Gorky's latest novel, and competent critics declare it to be his best. It is a realistic picture of the revolution and political life in Russia, broad in conception and bold, even sensational, in execution. He throws a powerful light on the under world and exposes the degradation, horror and mystery of the secret police system. The book is unusual in many respects, and it is indispensable to those who wish to understand the feverish conditions in Russia to-day.

The Art of Life Series

Edward Howard Griggs, Editor

"THE aim of this series of brief books is to illuminate the never-to-be-finished art of living. There is no thought of solving the problems or giving dogmatic theories of conduct. Rather the purpose is to bring together in brief form the thoughts of some wise minds and the insight and appreciation of some deep characters, trained in the actual world of experience but attaining a vision of life in clear and wide perspective. Such books should act as a challenge to the reader's own mind, bringing him to a clearer recognition of the problems of his life and the laws governing them, deepening his insight into the wonder and meaning of life and developing an attitude of appreciation that may make possible the wise and earnest facing of the deeps, dark or beautiful, in the life of the personal spirit."—*From the Editor's Introduction to the Series, printed in full in "The Use of the Margin."*

The latest volume:

GRIGGS, EDWARD HOWARD

Human Equipment: Its Use and Abuse

IT deals with the problem, so acutely important in our money-mad society, of the right use of things—the relation of man, both individually and collectively taken, to the tools and equipment of civilization. Its central thesis forms a trenchant criticism of the persistent superstition that lavish expenditure in careless luxury benefits society. The author shows, both by economic argument and historic example, that all use of the power money represents for what is either useless or harmful forces someone to work harder somewhere in the social structure, and, unchecked, is paid for at a terrible price in the end. Incidentally, there is an illuminating discussion of the causes of panics —those "clearing houses in which we pay our bad debts."

The style is peculiarly forceful and convincing, and the book is full of wise suggestions for the conduct of life.
